

Why sponsoring ECC?

ECC18 welcomes sponsors and exhibitors interested in promoting themselves to attendees of the conference, an international audience of around 700 research scientists and engineers in the field of systems and control from both academia and industry. The control community does research within a wide variety of topics. If you are a manufacturer, some of the results presented could provide future solutions to improve your products or production facility. If you are a consultant, service provider or want to advertise a product, you can promote yourself within your target group on an international forum. You can support us and give your contribution by becoming a sponsor. When the conference is finished you will of course gain access to the conference proceedings.

Option 1: Sponsoring
