Undergraduate Research Opportunities Program (UROP)

UROP aims to encourage young people to participate in research and to nurture the skills, experience, and confidence required for such an endeavor. The program has been running each summer for the last 10 years. Between 2009 and 2018, a total of 58 students successfully completed the program. The students participated in research spanning a variety of research areas such as: Intelligent Systems and Computational Intelligence, Communication systems and Networks, Power Systems and Renewable Sources, Environmental Management, Computer Software and Hardware, Health Care and Biomedical Systems.

Students are expected to spend an average of 30 hrs/week for 4 to 8 weeks between June 3 and July 26. The weekly salary is €200.

Now Accepting Applications for the
Summer 2019 Session

Research real world problems in exciting research areas!

Partner with Researchers who are leaders in their fields!

“I had the opportunity to participate in technological research projects, with the KIOS Faculty and Researchers, which contributed to the advancement of knowledge in the area of Power & Energy. Definitely UROP program boosted my willingness to learn, a remarkable experience which equipped me with lots of new Knowledge, skills and competencies.”

A. Pallis

“My participation in UROP was a unique experience because I had the opportunity to become a member of an interdisciplinary research community and engage in real research activities. During the internship I was able to use that time to develop my research skills and my ability to cooperate as part of a research team.”

A. Kouloumbris
