An overview of the research system in Cyprus is available at **ERAWATCH**

After **nine completed calls** for ERC Starting and Advanced grants, more than **3 000 projects**¹ have been selected to receive ERC funding throughout the EU and its associated countries, representing around **€ 5 billion in grants**. In total, the ERC has received over **31 000 project proposals** for these calls. The grants are open to researchers of any nationality provided they are willing to be based in a host institution in Europe², where they need to spend at least half of their research time.

* Including some 40 for the Starting Grant 2007 call

**National support initiatives**

For the Starting Grant 2009 call, a scheme managed by the **Research Promotion Foundation** (RPF) offered national funding to the ERC candidates who passed the threshold but were not funded because there were insufficient funds to support them. The RPF falls under the control of the **Planning Bureau** and the **Ministry of Finance**. The first meeting of the newly-founded Cyprus Scientific Council (CSC) took place in 2010. The main objective of the CSC is the provision of scientific advice to the National Council for Research and Innovation – contributing towards the drafting and development of policy and strategy in the fields of research, technological development and innovation.

¹ ca. 2 700 already financed
² In the EU or the FP7 associated countries (Albania, Bosnia and Herzegovina, Croatia, Faroe Islands, Former Yugoslav Republic of Macedonia and Serbia, Iceland, Israel, Liechtenstein, Moldova, Montenegro, Norway, Serbia, Switzerland, Turkey)
Some Cypriot key personalities in the ERC

4 Cypriot scientists are serving as ERC panel members, in charge of the evaluation of proposals and the selection of grantees.

ERC in the Cypriot media

Researchers get funding

Published on July 30, 2012

Two Cypriot researchers funded by the European Research Council (ERC) will give a talk today at the informal Competitiveness Council in Nicosia.

Dr. Marco Anagnostides and Prof. Elias Polycarpou, both from the University of Cyprus, will highlight the benefits of ERC funding and present their projects during the lunch event with the 27 EU research ministers.

Cyprus has been highly successful in the ERC scheme, in spite of the relatively small size of its research system. With a total of 65 ERC grants receiving funding of €6.7 million, it has nearly three times more ERC grants than would be expected given its share of public sector researchers in the EU.
