

KIOS CENTER OF EXCELLENCE

UROP 2017

Undergraduate Research Opportunities Program (UROP)

UROP aims to encourage young people to participate in research and to nurture the skills, experience, and confidence required for such an endeavor. The program has been running each summer for the last 8 years. Between 2009 and 2016, a total of 42 students successfully completed the program. The students participated in research spanning a variety of research areas such as: Intelligent Systems and Computational Intelligence, Communication systems and Networks, Power Systems and Renewable Sources, Environmental Management, Computer Software and Hardware, Health Care and Biomedical Systems.

**Summer 2017
Session**

Research real world
problems in exciting
research areas!

Partner with
Researchers who are
leaders in their fields!

"I had the opportunity to participate in technological research projects, with the KIOS Faculty and Researchers, which contributed to the advancement of knowledge in the area of Power & Energy. Definitely UROP program boosted my willingness to learn, a remarkable experience which equipped me with lots of new Knowledge, skills and competencies."

A. Pallis (UROP 2015)

"My participation in UROP was a unique experience because I had the opportunity to become a member of an interdisciplinary research community and engage in real research activities. During the internship I was able to use that time to develop my research skills and my ability to cooperate as part of a research team."

A.Kouloumbri (UROP 2015)
