

**Short Bio:**

Awais Rashid is Professor of Cyber Security at the University of Bristol where he leads the Bristol Cyber Security Group. His research focuses on security and privacy in large connected infrastructures, in particular cyber-physical systems security, software security and usable security and privacy. He is Director of the EPSRC Centre for Doctoral Training in Cyber Security and also leads the SCULI Research Programme on Securing Convergent Ultra-large Scale Infrastructures. He is also Director of the UK's National Research Centre on Privacy, Harm Reduction and Adversarial Influence Online (REPHRAIN) and the lead and editor-in-chief of CyBOK, the Cyber Security Body of Knowledge. He also leads research on readiness of software engineers and developers to work with new secure hardware as part of the Digital Security by Design programme. He also previously led projects as part of the UK Research Institute on Trustworthy Interconnected Cyber-Physical Systems (RITICS), the UK Research Institute on Socio-technical Cyber Security (RISCS) and the National Centre of Excellence on Cyber Security of Internet of Things (PETRAS). He was also a Fellow of the Alan Turing Institute (2018-2021).
